Floor Mounted

WILSON Track Hardware

Form quick, economical walls at a fraction of the cost of standard construction. Break up large areas into smaller compartments for safety, privacy and convenience.

Wilson Track Hardware moves on quiet nylon rollers set in steel track. All components are hot-dipped galvanized or zinc plated to prevent rusting.

Available in five suspension methods (may be used in any combination):

1. Beam/Vertical Suspension
2. Wall Mounting
3. Ceiling Mounting
4. Floor Mounting
5. Threaded Rod Mounting

Did You Know?

The experts in customer service at Wilson Industries can help you design work areas within a space using their Wilson Track Hardware. You can be sure that layout of the space, the suspension method and connectors they suggest are the best for your application.

How to Order

1. Determine dimension of each side
2. Choose suspension system
3. Order all necessary parts based on
 - a. suspension system
 - b. type of corners (deduct 2 feet from adjacent track sections for curved corner)
 - c. length of sides (sides should be supported at maximum 10' intervals)
4. Select Wilson fabric and order curtain(s). Add 10% to width for proper drape. Specify height and width.

Note: Wilson Track Hardware is shipped disassembled. Nuts and bolts not included.
